17/07

05681

PLANTING DIRECTIONS

1. **Locate** well drained planting site. See exposure guidelines in the front of this plant care tag
2. **Dig** a hole slightly larger than pot size

3. **Remove** plant from pot by grasping it tightly and tapping edge of the pot, then carefully work the plant loose

4. **Place** plant in hole at level that keeps main stem at its original depth

5. **Backfill** hole with soil, pat down firmly

6. **Water** well to settle soil, add more soil if necessary

7. **Soak** plant with water every other day until it is well established and new growth appears

8. **Fertilize** with a 20-20-20 or general fertilizer in spring and mid summer (use according to directions on label)

This plant has been selected for your enjoyment by your independent garden specialist

Container Net Contents: **3 Quarts (2.84 Liters)**
